EDUCATION

Cornell University

Ithaca, NY

Bachelor of Science in Information Science

Expected May 2028

Relevant Coursework: Design & Web Programming, Object-Oriented Programming and Data Structures, Intro to Data Science, Data Structures and Functional Programming, Linear Algebra for Data Science

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL, Dart

Frameworks: React, Next.js, Node.js, FastAPI, Django, Flutter, Tailwind CSS

Developer Tools: Git, Docker, Linux, CI/CD, PostgreSQL, MongoDB, Firebase

Libraries: LangGraph, React Query, HuggingFace Transformers, Pandas

EXPERIENCE

Larsen & Toubro Semiconductor Technologies (LTSC)

Bengaluru, India

Software Engineering Intern

June 2026 – August 2026

- Developed a plugin-based Python test automation framework that executed 500+ official NIST test vectors at 100% conformance.
- Built an AI agent debugging layer that automatically triaged every test failure and traced its root cause across the pipeline.
- Projected a 70% reduction in engineer debugging time versus manual log inspection through automated AI-driven failure triage.
- Automated extraction and parsing of test vectors across JSON, CSV, and TXT formats into standards-aligned validation reports.

CRAIIVE (AI Food-Inventory Startup)

Ithaca, NY

Software Engineering Intern, Full-Stack

September 2025 – May 2026

- Integrated a Gemini API pipeline generating recipe suggestions from live inventory data across 3 production Flutter app screens.
- Optimized Firebase schema and indexing strategy, improving query reliability and cutting latency in recipe-generation workflows.

Cornell Ann S. Bowers College of Computing & Information Science

Ithaca, NY

Teaching Assistant — Intro to Web Development

August 2025 – December 2025

- Led weekly lab sections for 40+ students covering HTML, CSS, and JavaScript; office-hour support lifted class average by 10%.
- Co-designed grading rubrics and automated evaluation scripts with course staff, reducing assignment turnaround time by 30%.

PROJECTS

ORCA — AI Agent Guardrail System (LTTS Hackathon)

July 2026

- Created the Policy Gate, a deterministic rule engine screening every AI-agent action before it was ever allowed to execute.
- Enforced denylist, prompt-injection guard, least-privilege allowlist, and human-approval interlock rules before any execution.
- Designed a two-agent Governance Gate: a task agent reported confidence and a judge agent independently reviewed its output.
- Constrained the judge strictly to task standards and safety data; agent agreement scored high while divergence froze the run.

Noteleaf — Ambient AI Meeting Notetaker

April 2026 – June 2026

- Engineered real-time speech transcription with the browser Web Speech API, processing all audio on-device for user privacy.
- Classified each spoken sentence into actions, decisions, or insights in under 1 second, with AI recaps via NVIDIA Nemotron.
- Designed an 18-endpoint Fastify REST API with httpOnly-cookie JWT authentication and 30-day auto-rotating refresh tokens.

Nestopia — Rental Matching Platform

January 2025 – March 2025

- Designed relational database models for property listings, renter profiles, and authenticated landlord-renter interactions.
- Implemented a preference-weighted scoring system ranking renter-landlord compatibility by location, price, and amenities.
- Built authentication and listing pipelines with dynamic filtering and query optimization; deployed the backend live to Railway.

CF AI API Copilot — Cloudflare Workers Assistant

October 2025 – November 2025

- Built a Cloudflare Workers AI assistant ingesting OpenAPI/Swagger specs, persisting digests and chat history in Durable Objects.
- Auto-generated cURL and fetch code snippets for every documented endpoint; deployed live on the Cloudflare Workers runtime.

LEADERSHIP & ACTIVITIES

Accessible Media Resource Center, Student Disability Services, Cornell

Ithaca, NY

Project Coordinator

May 2025 – Present

- Managed project workflows, assignment scheduling, and quality-control proofreading, delivering accessible formats to students.

Treasurer, East Africans Students Together — managed club budget, funding requests, and event finances (Aug 2025 – Present)

Member, Cornell Blockchain Club — engineering workshops on decentralized systems and smart contracts (Feb 2025 – Present)
